Salutations!

Use GardenWorks Instead of a Photo Album

This is how one of our users has used **GardenWorks** to help her clients with choices: *"Wow-the pictures are wonderful!! I am so excited because I am working with a client who wants a pond and you have so many different styles for me to show her. I know that with all the ideas provided on the software, I will be able to design the pond of her dreams."*

This same designer also says: *"I am going broke buying tons of magazines, so with (**GardenWorks**), it really helps with ideas. I just bought a scanner so all those magazines won't go to waste; I will just add them in the program. I feel **so in the groove** using my computer to show clients different ideas. My mother and I had an Interior Decorating business during the 70's thru the 90's and all the samples and stuff you had to carry in the car was overwhelming. So being able to walk into client's home with my computer and a few samples is well, so easy and so professional!!"*

In addition to using **GardenWorks'** photo library as the above designer does, you can also add your own landscape photos, either your work or pictures from your favorite botanical gardens. Show completed landscape projects that you have done on your laptop computer. Or you can print them out before your meeting and leave them as part of your presentation portfolio.

GardenWorks helps you look professional and keeps your portfolio organized. It contains over 200 different kinds of landscape examples to show your clients, from different styles of gardens to hardscape ideas. Click on the below link to get more information about **GardenWorks**.

GardenWorks

Have a great Memorial Day weekend!

Sincerely,

Anne Chilcott
