BAKER RESIDENCE: January Maintenance Schedule

Pruning

Trees

Eucalyptus salmonophloia: Avoid pruning from May to Oct. If pruned, seal cuts to prevent sap flow.

Shrubs

Anthurium andraeanum: Flowers last 4 weeks after cut.

Annuals

Impatiens new guinea hybrids: Not necessary.

Shrubs

Rhododendron 'Anah Kruschke': Frequent pinching of tip growth from after flowering to August.

Fertilization

Trees

Eucalyptus salmonophloia: Seldom needed although iron needed for trees with yellow leaves.

Shrubs

Anthurium andraeanum: Give light feeding every 4 weeks.

Annuals

Impatiens new guinea hybrids: Give ample fertilizer.

Shrubs

Rhododendron 'Anah Kruschke': If leaves turn yellow while veins remain green, use iron chelate to soil

Integrated Pest Management

Trees

Eucalyptus salmonophloia: Longhorn beetle infests after pruning. Freshly cut wood is a lure.

Shrubs

Anthurium andraeanum: Trouble Free plant

Annuals

Impatiens new guinea hybrids: Trouble Free plant

Shrubs

Rhododendron 'Anah Kruschke': For root weevil larvae that feed on roots, apply diazinon to soil, 6" deep.

Watering Instructions I

Trees

Eucalyptus salmonophloia: Water every day for newly planted trees if weather is hot and dry.

Shrubs

Anthurium andraeanum: The higher the humidity the better. Keep pots on trays of moist gravel.

Annuals

Impatiens new guinea hybrids: Don't let soil dry out.

Shrubs

Rhododendron 'Anah Kruschke': Never allow soil to wash in and bury stems.

Watering Instructions II

Trees

Eucalyptus salmonophloia: Taper off to 1 or 2 waterings a week during the rest of 1st growing season.

Shrubs

Rhododendron 'Anah Kruschke': If soil is high in dissolved salts, periodically leach by heavy watering.

General for January

Maintenance: Weed and cultivate planter beds
