Botanical Name: Fremontodendron 'El Dorado Gold'

Plant Type: Shrub Ground cover

Common Name: El Dorado Gold Fremontia

Family: Sterculiaceae

Height Range:

3-6'

Leaf Season

Evergreen

Habit:

Mound

Width

6-12'

Leaf Color:

Green

Design Styles:

Mediterranean Seascape Spanish Wild Garden

Flower Color:

Orange Yellow

Sun:

Full sun

Accenting Features:

Showy Flowers Unusual Foliage

Flower Season:

Spring

Water:

Drought tolerant Light water

Seasonal Interest:

Spring Summer

Fruit Color:

n/a

Growth Rate:

Moderate

Location Uses:

Background Foundation Park

Fruit Season:

n/a

Soil Info:

Sandy soil Loam soil Rocky soil Average soil Well-drained soil Neutral pH

Special Uses:

Erosion Control Mass Planting

Fruit Type:

n/a

Adverse Factors:

Allergenic

Attracts Wildlife:

n/a

Details:

This low-mounding shrub has small, green leaves with yellow/orange flowers that bloom in spring.

Notes:

Dig hole, insert plant slightly higher than soil grade. Disturb root ball very little. No amendments, just native soil. No fertilizers. Backfill the hole. Water lavishly. Mulch top of soil around plant in a 4' diameter circle. - Bert Wilson Las Pilitas
